DUBLIN FREEMEN ELECTORS COMMISSION, 1869.

REPORT.

TO THE OUTEN'S MOST EXCELLENT MAJESTY, ...

WE, THE COMMISSIONESS appointed by the statute passed in the session of Parliament held in the 32nd and 33rd years of your Majesty's reign, entitled "An Act for appointing Commissioners to inquire into the existence of corrupt practices amongst the freeme elector of the city of Dublin," and thereby empowered and directed to make inquiry into the existence, nature, and extent of such corrupt practices, and into the conduct of all persons adding in or abetting such corrupt practices, humbly submit this our Report to your Maissty :-

We commenced our inquiry upon the 29th Navember, 1869, at the Court-house in Green-street, Dublin, where our sittings occupied forty-one days; the proceedings being conducted in all respects in the same manner as inquiries by Commissioners appointed under the provisions of the Act of the 15th and 16th years of your Majesty's reign, chapter 57.

At the outset of our inquiry we found considerable difficulty in obtaining any useful information; and this, coupled with a variety of circumstances, caused our investigation to be protracted to an extent which we did not at first anticipate. Our inquiry into the conduct of the freemen electors of Dublin involved an examination into the history of we lest sense days in an attempt to discover the extent of the corruption, in its grosser from, by tassing, out the persons through whom cortain railway telects used as tokens are considered to the constraint of the constraint of the constraint of the case into the hands of friends. We had, however, at that time, no reason to satisfying the disclowers which is afterwards appeared one of the persons engaged in thus briding freemen at the last election was prepared to make; and it may be added that we were in some measure tel to pursue that course of inquiry by information then unspilled to us through our secretary, but which turned out to be nearly altogether valueless.

Our investigation in accordance with the provisions of the statute in this respect, was at first directed to the existence of corrupt practices amongst the freemen at the election of 1868; and the evidence before us having clearly proved that such prevailed on that occasion, we proceeded with the like result to inquire into the conduct of this class of electors at the election of 1865, and from thence back to the elections of 1859 and 1857, successively; ascertaining that on each of these several occasions, corrupt practices had more or less prevailed amongst the freemen. After a careful examination, however, into the election of 1852, we were unable to discover any trace of such corruption having been then practised; and, accordingly, in obedience to the provisions of the statute we

did "not inquire concerning any previous election."

It is proper to observe that in 1867 Sir Arthur E. Guinness was returned, without any contest, to represent the city of Dublin, in the place of his father, then lately dead; and on this occasion, of course, no corruption took place. We were of opinion, however, that an unopposed return of that kind was not such an election as is contemplated by the enactment just referred to. And, the evidence having satisfied us that corrupt practices had prevailed amongst the freemen electors of the city of Dublin at the general election of 1868, we believed it to be our duty to inquire as to the existence of similar practices at previous contested elections.

Before we proceed to state the results of our inquiry into the circumstances of these several elections of 1868, 1865, 1859, and 1857, it seems desirable to call attention as briefly as we can to the nature and constitution of the freemen electors of the city of Dublin, and their relation to the general body of the citizens.

The Corporation of Dublin claims a title by prescription, and is at all events of great

antiquity. Its first charter is one of King Henry II., greating the city of Dublin "to "his men of Bristol to inhabit; strictly enjoining them to inhabit the same and hold it of "him and his heirs, with all liberties and free customs which the men of Bristol had at "Bristol and throughout all his realm." This was followed by a charter of John, when Earl of Morton and Lord of Ireland, confirming these rights to the citizens of Dublin "dwelling there as far as the motes of the city," and by a number of other charters from successive sovereigns, confirming the old and granting new privileges. It is sufficient to say that from the language of these ancient instruments, it would seem that here as in other places the freedom of the city was once enjoyed by all the resident and trading inhabitants who shared in the payment of local taxes and the performance of local duties. As far back, however, as usage can be traced, the right to be admitted as a freeman is found to have depended upon "birth," "marriage," or "service;" that is to say, the claimant must have been the son of a freeman, or have married the daughter of a freeman, or have served as apprentice to a freeman; all these being probably but so many modes of ascertaining the general condition of established residence. For the most part, too, admission to the freedom of the city was only to be obtained after admission into one of the guilds or brotherhoods of trades, which, in the middle ages, formed the general civic organization of Dublin as well as of other large towns. Still the governing body of the city, and the subordinate governing bodies of the guilds, eeen from a very early period to have exercised an arbitrary control over the admission of freemen; and it became, after a time, more and more usual to admit persons by "grace "especial," that is, by the favour of the governing body, a practice which ultimately caused the privilege to be conferred, to a very large extent, upon non-residents. In consequence of the peculiar legislation of the seventeenth and eighteenth centuries, the Corporation of Dublin and the several guilds also became composed exclu-

sively of Protestants. After 1793, indeed (when the statute 33 Geo. III., chap. 21, was passed by the Irish Parliament), Roman Catholics were no longer debarred by law from the enjoyment of any corporate privileges; but, as we learn from the Report of the Commissioners on Municipal Corporations in Ireland, members of that Church continued even down to the year 1835 to be completely excluded, though the disability had been removed for more than forty years. Moreover, as the condition of society altered with longer possessed it, it was without value for purely civic or commercial purposes.

the lapse of time, the freedom of the city ceased to carry with it a right to special privileges or immunities of trade; and for the great mass of the citizens who now no Owing to this combination of circumstances the freemen of Dublin became in modern a very different body from what they probably were in ancient times. At the date of the Report of the Commissioners on Municipal Corporations in Ireland, they were oper, p.10, freemen still continued to be admitted according to the ancient modes of election,

merely a fraction of the inhabitants of Dublin, numbering in all about four thousand persons, of whom a large proportion were non-residents; and they were, as we have seen, all Protestante, and deeply imbued with strong Conservative principles. The subject, however, to such restrictions and innovations as had been introduced; and ablest, however, to such restrictions and have respectable persons, a large schmixture of very poor efficients; but the body had long oussed really to represent the commonalty of Dublin, and had become in many respects a political organization of very decided views and tendencies From an early period the freemen of Dublin had acquired the privilege of voting at the

election of members to represent the city in Parliament. The Irish Reform Act of 1832 (Statute 2 & 3 William IV., cap. 88) while it created other franchises of a new and extensive kind preserved to the freemen this ancient privilege, though subject to some important qualifications. It required that in order to have the right to vote, freemen

should be resident in the city, or within seven statute miles from the usual place of election; and excluded from the exercise of the Parliamentary franchise all merely honorary freemen admitted subsequent to the 30th of March, 1831, though it did not 1. 46. 5. 3E. largely alter the general character of the body.

like the English Reform Act, exclude also persons admisted as freemen by right of "marriage" after a particular day. These provisions seem to have soon reduced considerably the number of non-resident, and honorary freemen; but they could not 3 & 4 Vist. By the Act for the Regulation of Municipal Corporations in Ireland (Statute 3 & 4 Vict., cap. 108) the government of the city was entirely remodelled. Under the provisions of that Statute the municipal constituency ceased to consist of freemen as such; they being now entirely replaced by a new body termed "burgesses," whose qualification was made substantially to depend on the possession of certain property within the city and the payment of a dose proportion of the local taxes. From this new constituency the different members of "the Council" to which the management of

However, although their municipal functions were thus at an end, their Parliamentery franchise as reserved by the Reform Act was left unchedy and the Frommen now vanatized as merely a political organization, having in that respect distinct and possible proclaim privileges as compared with the great mass of the citizens. The old spraining induced, of sectarias exclusiveness being at last securethal weakened, the names of Roman Catholics began to appear upon the "Freemen's Roll." But, after all, the number of Roman Catholica who have gained admission has been so inconsiderable as scarcely to affect, in any approximate degree, the general political character of the body; and, under all the changes which have occurred the Freeman, regarded as a poculiar class of electors, may be said to have remained and still to remain, politically speaking, much the same as of old. It is, perhaps, needless to add that, being so strong a body, and having no other functions left, they have continued to play an important part in the elections of representatives for the city. According to the list supplied to us by the proper officer, the number of freemen at According to the net supplied to us by the proper officer, the number of freemen at present cuttiled to the Parliamentary franchise appears to be 3,563 [that to be rest of the contributory belong 11,375. Of the freemen, so far as we can judge, about 60 were admitted by "grace especial" or see "honovary freemen" piero to global of March, 1531; and, therefore, retain their franchise as not being within the dissolves to make the form and the form th very early period the ordinary recognised means of acquiring the freedom of the city. Here, however, we must remark that with respect to the titles by "birth" and "marriage" a very

important modification has taken place, and one which has led to the admission of a considerable number of freemen. Anciently, as we have seen, and even in 1835, General according to the Report of the Commissioners on Municipal Corporations in Ireland, the title by "birth" or "marriage" was confined to immediate descendants; that is to say, or or Mosé the claimant must have been the son of a freeman, or have married the daughter of a significant freeman. But at some time, which it is difficult to fix, these titles began to be extended freland, 15 to persons second in descent, and the grandsom of freemen, or those who had married the granddaughters of freemen, were allowed to claim admission. This title to admission by "grand-birth," as it is called, or by marriage of a granddaughter seems to be peculiar to Dublia, being as far as we can ascertain wholly unknown in any other city in Rugland or Ireland. In Bristol, where we find that the freedom was formerly sequired by birth, marriage, apprenticeship, or purchase, admission by birth has always required that the claimant's inther shall have been a freemen, and have been so admitted prior to the claimant's birth, as well as that the latter shall have been actually born within the city. In Dublin too there appears to be no trace of admission on such grounds as "grand-birth" or marriage of a granddaughter prior to the year 1796; and as long after that date we find instances of the freedom having been conferred on grandsons of freemen by "grace " it seems not improbable that the practice originating in that way, "grandbirth" and marriage of a granddaughter, were at last treated as real title at odmission when the "grace especial" could so longer be resorted to for the purpose. The practice,

indeed, though on a case reserved for the Judges not held illegal, having regard to the statement of facts so submitted to them, has never been generally accepted as a rightful statement of facts so submitted to taken, mas never tools generally as a matter of fact no case.51.5-means of acquiring the freedom of the city; and it appears that as a matter of fact no case.51.5admissions by this anomalous title have been effected since 1865. According to the statements of some of the witnesses examined by us it would seem that claims by virtue of this questionable right are liable to much abuse; and it must be admitted that the evidence adduced to sustain them is, and from their nature must be,

frequently of an unsatisfactory character The freemen electors, admisted, from time to time, under the general heads of "birth"

and "marriage," number at present 2,138; of whom not less certainly than 683, and probably more, derive under the titles of grand-birth, or marriage of a grand-daughter. The number of those deriving by right of "marriage" is in all 379. As to ten of these the dates of their admissions do not appear; but the remaining 369 have been admitted since the parsing of the Irish Reform Act of 1833, and 351 of them since the

passing of the Act for the Regulation of Municipal Corporations in Ireland.

The freemen electors admitted by right of "service" number only 864; and we think it hilely that the comparatively low Homan Catholice who may be found in the entire body are included in this estegory. The prescribed service is apprenticable to a

freeman for a period of seven years. resuman of a puriou on even years.

The course of proceeding by which freemen are at present admitted deserves to be briefly noticed. The claimant fills up a short petition, technically called a "Besselh," which sate forth the grounds of his claim. This document, with a few of eightness missing is lodged with the city treasurer, and by him forwarded to the town clark, whose duty it is to record the admissions. But claims are antitabled or opposed for the most part by agents of the Opensystate and Elishen Registration Societies, who usually of all the periminary bearines, filling up and furminding the "Besceban," and very generally paying the from for the claims. The number of admissions has of late years varied greatly, being, for example, in LSGI, 540, whilst in 1866 it was only 31; and some evidence was given to us that, generally speaking, it was large when a Conservative and small when a Liberal Lord Mayor

happened to be in office.

We would not, however, lay much stress on these matters which did not fall within the scope of our investigation; but we must remark that, having regard to the evidence of saveral of the wintesses on both sides, it cannot be doubted that a considerable number of the freemen have always been open to corrupt influences at elections. This

number was variously represented to us by the different witnesses as ranging from 200 to 800, and may, we think, he fairly taken to be about 500.

Having now glassed briefly at these preliminary matters, the first election to which we shell feel in the stark to look place in March, 1837. The representation of the city was then contested by Sir Erlevard (then Mr.) Grogen, and Mr. Haynolds on the Conceptivity, and by Messer, Prenice William Brayle and John Reprofile on the Conceptivity, and by Messer, Prenice William Brayle and John Reprofile on the Conceptivity of the Proposition of the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Kernan and Tracey for the June 1997, and the Conservative and Messer, Messer and Messe DEDOT

"it did not appear that any distinct promise to that effect was made." Also, "that "after the election hones were held out to cartain of the freemen that they would be "paid when the period for presenting petitions had expired; but that it did not appear "that this was done in a precise or definite manner, nor was it done with the cognizance "of the sitting members, or any duly authorized agent on their behalf." And further, "that a sum of £16 16s was applied by the Treasurer of the Freemon Protestant Fol-"lowship Society in treating and in direct payment to voters, and that he applied to the "agent of the sitting members to reimburse the funds of the society for this payment;
"that this transaction, however, was without the knowledge or authority of the sitting "members, and when the application for the repayment was made to their agent it was "declined." So far as we were able to ascartain there would not appear to have been any bribery of freemen at that election by agents or others assuming to act for the Conservative candidates; but a considerable sum of mosey was spent in purchasing the votes of free-men by persons in the interest of Messus, Brandy and Beynolds. The number of freemen polled for those gentlemen respectively was, as we have seen, 383 and 349; and it ampears that a sum of from £700 to £800 was distributed for the purpose of obtaining freeman votes. Mr. Charles Kernan, solicitor, one of the conducting agents of Messra. Brady and Reynolds, directed and controlled this operation, which we are satisfied was unknown to and unsanctioned by the candidates or cother of them; and seems to have oriorinated in Mr. Kernan's conviction, expressed to us, that " the election was hopeless for the Liberals unless they were prepared to bribe extensively." Mr. Kernan intrusted the abovementioned sum to a young man named James Dillon, since deceased, son of Mr. Thomas Dillon, to whom we shall presently have to refer in connexion with the election of 1859; and Mr. James Dillon, aided by some persons whose names we could not discover, appears to have distributed it, on the day of the election, among certain freemen, in or about Green-street and Halston-street, near the place of polling. A man named Patrick Nolan distributed about £70 (afterwards repaid to him by Mr. Kernan) in the same way and for the same purpose, in sums varying from £1 to £3 10s.; and a man named Christopher Ward, in concert with him, sent freemen with dockets to receive their share of this money. Mr. Nolan handed us documents containing the names of 28 freemen bribed by him in this way. An old man of the name of Cogun, since decessed, is stated to have attended some of the freemen to the poll, and to have amisted Nolan in paying them after they had voted. Of the £700 or £800 thus expended by Mr. Kernan, it is quite possible that some small portion was absorbed in paying for the rooms and other arrangements by means of which the bribery was carried on; but we have no doubt that with this deduction the entire of the money was expended in corruptly influencing the votes of freemen as originally designed. The number so influenced may, we think,

be taken as nearly 300.

We have inserted in Schedule A to this Report, the names of such of the freemen bribed at the election of 1857, as the evidence has enabled as to identify.

In Schedule B will be found the names of the persons whom we have ascertained to

here been guilty of beliefun freezons at that checken.

The mater distinct flow for the GW EV and T

conviction that in this as in the preceding instance neither of those gentlemen authorized or was cognizant of his acts in this particular province.

Mr. Kernan appears first to have intrusted a sum of £1,000, which was paid at the office of the Hibernian Bank in Duhlin, to Mr. Thomas Dillon of Bachelor's walk, father of James Dillon, employed in a similar way in 1857; and Mr. T. Dillon took care that this sum should reach the hands of agents to be distributed among the freemen. The associates he employed were John Lightfoot, James Donnelly, Thomas Burgess, and a man called M Cabe, all of whom, with the exception of M Cabe, who had died, were examined before us. Lightfoot deposed that he bribed from 20 to 30 freemen; Donnelly, as he states, 155 or 156; and Burgess about 95. Mr. Donnelly handed to us nome voting cards of that election, on the backs of five of which appear the names of certain freemen written in pencil. These he stated were the freemen bribed by him; the writing being that of a person named John Flood, then a clerk in his employment, and through whom he paid the money to the voters, but who left this country about two years ago. The total number of names appearing on these cards does not come near to the 155 or 156 which Mr. Donnelly positively deposed to be the number of freemen whose votes he purchased on this occasion. As he states, however, that he distinctly remembers the number to have been that just mentioned, and no care appears to have been taken to preserve the cards containing the names, those produced to us being as he says forth-coming by mere accident, we think it probable that some other cards containing the rest of the names may have been lost, and that credence should be given to Mr. Donnelly's positive statement. Save as appears by these cards we have no means of ascertaining the names of the freemen who were bribed at this election. Several of the names too are no longer legible in consequence of the lapse of time, but we have been able to decipher a considerable number of them, and these will be found in Schedule C to this Report It is of course impossible to ascertain the number of freemen bribed by M'Cabe;

but it cannot be doubted that the whole £1,000 were expended by the four persons employed by Mr. T. Dillon, or by other persons similarly employed in bribing freemen; and there is reason to suppose that the tariff for this purpose ranged at from £3 to £5 and there is toward to suppose that for term for the peaper seeight at 1001 3.5 or 20.0 a head—the latter sum being the price towards the close of the poll. The first £1,000 having been spent in this manner, Mr. Kernan directed that a second sum of £1,000 should be given to Mr. T. Dillen for the same object; but at this last-mentioned sum did not reach Mr. Dillon until the afternoon of the day of the election, a small portion

of it only, perhaps from £100 to £150, was laid out in bribing freemen.

In addition to these sums thus spent through Mr. Dillon, a man named Bernard Connell, an Inspector of freemen for the Liberal Registration Society, deposed to us that he bribed from 20 to 30 freemen; and stated that he received the money for the purpose from a gentleman whom he met in Sackville-street, opposite the establishment of Mesura. M Swiney, Delany, & Co., to which place he had been directed by persons in the committee-recons of the Liberal candidates.

Upon the whole, we think it certain that the number of freemen bribed upon the Liberal side at this election was considerably over 300 We have inserted in Schedule D to this Report the names of the persons whom we

have ascertained to have been engaged in hribing freemen at this election.

We pass on to the general election of 1865. At this conjuncture the candidates for the representation of the city were Sir Benjamin (then Mr.) Lee Guinness and Mr. John Vance in the Conservative and Mr. Jonathan Pim alone in the Liberal interest. Mr. Frederick Sutton and Mr. William Gibson acted in concert as conducting agents for the former; whilst Mr. Pim's interests were committed to the charge of Mesers. Molloy and Watson. Messrs. Guinness and Pim were declared duly elected; the votes for them being 4,739 and 4,653 respectively, and those for Mr. Vance 4,073. The freemen votes were as follows :- For Mr. Guinness, 1,875; for Mr. Pim, 650; and for Mr. Vance, 1,930. At this election there were corrupt practices amongst the freemen on both sides, though in different degrees; but we have reason to believe that none of the candidates took part in or subtlorized them. Indeed Mr. Guinness appears to have declared actively

against them We shall first consider the nature and extent of corruption practised among the frosmen by persons in the Conservative interest. It appears that a short time before the election an opinion prevailed among certain of the Conservative sub agents that "some of the freemen were to get something;" and on the evening before the day of polling Mr. Thomas Henry Atkinson, who was then Assistant-servetary of the City Conservative Registration Society, gave directions to William John Campbell, then and long afterwards holding the office of inspector of the freemen, that a house should be hired for the purpose of paying some of this class of voters. Campbell accord-

ingly engaged a room in a bouse in Little Deamark-street, belonging to a man named Powell. And Mr. Athinson, Mr. Henry Hopkins Foster, who then held a situation in the Registry O Dead Office, O Debin, and who to take a leading part in these and like proceedings at the last election, and a Mr. Herbert Purcell, then a very young man, were cornected entirely a part of the night in an upper rooms of the house in Westmartland-street, in which the Conservative contral committee-rooms were, in arranging the machinery for the intended purpose. Mr. Foster, who seems to have been the chief agent in the business, prepared and estable about 300 curvelopes, which Mr. Purcell directed to "Mr. Johnston". These on the morning of the election were given to Mr. Atkinson for distribution as vouchers among the freemen; and Mr. Atkinson declares that he distributed about forty or fifty of them, though Mr. Purcell puts the number at nineteen only. They were given by Mr. Atkinson to Campbell, to a man of the name of Robert M'Grath, and perhaps to some other persons, and by them were handed to freezeen as they polled, with directions to go for payment to the bonse which had been hired in Deamark-street for the purpose. A certain number of freemen who had thus received the envelopes did go to Powell's house after voting: but they were disappointed in their expeciation of finding money there, the intended arrangement for paying them having been frustrated in consequence, it was alleged, of a resolution expressed by Mr. Guinness

that he would not lay out "sixpence" in such a matter.

The number of framen thus dealt with is computed differently at from fifty to sixty and from thirty to forty; but it is unquestionable that a considerable number were sent to Powell's with an assurance that they would be paid, and were so incensed at finding their bopes disappointed that some of them threatened to pull down the house of Mr. Vance, one of the cardidates. To keep them quiet refreshments were given them at Powell's on the order of Campbell, who had been sent by Mr. Atkinson to the place to see what could be done. And soon after the election was over a sum of from £60 to £90 was actually distributed at Powell's among certain of the freemen who The transfer of the first state "being over, and in order that there should be no row, feeling it would be indiscreet
and injudicions to have Mr. Vanne's name brought forward in the matter in that
way." The money was at first republic to Mr. Falls by Mr. Vanne's better, and altimately to the latter by that gentleman himself on an ascurance that it had been

expended to mye his house. It is not possible for us to state with precision the number of freezen who were corruptly dealt with in the course of these transactions; but we think it may be safely ables as between forty and fifty persons. Having regard to all the circumstances, we do not impute to Mr. Gibson or to Mr. Vancs any noiseal participation in the corruption which thus took piece. Neither had any knowledge of the armagement corruption which thus took piece. Neither had any knowledge of the arrangement till after the election; and though Mr. Gibson sanctioned the payment of freemen in fulfilment of the promises made to them, he seems to have done so with no improper motive; whilst Mr. Vance, after several refusals, only repaid the money at last with

great reluctance, and because he was shown that had it not been advanced to pacify the freemen his bouse would have been attacked. The corruption of freemen on the Liberal side at this election, though more difficult to trace, was on a much larger scale. It appears that Mr. Pun became a candidate a

few days only before the election; and this circumstance possibly ascounts in some degree for the amount of influence brought to bear upon the freemen, or at least for the form which it assumed. Mearn Molloy and Watson, the conducting agents of Mr. Pim, found at once that it would be necessary to hold out expectations to a certain number of the freemen; and the plan was then devised of issuing a very large number of cards, for the purpose of employing freemen as canvassers, upon a promise of renume-ration. These convassing cards accordingly were printed and distributed to an immense extent, their recipients being for the most part freumen, though some were obtained by other voters; and it cannot be doubted, upon a fair review of the evidence, that although in some instances long fide convasuing work may have been done, and the voter may not have been improperly influenced, still, as a general rule, the employment was to procure the vote, and was in fact to be the price of it.

Several sub-square were engaged in this business, which from the first was of a Several sub-square were engaged in this business, which from the first was of a person named Richardter, and in fact, as we believe, a mere blind for corruption. A person named Richardt Eustace, who had some business connexion with Mr. Pim, put himself in communication with a freeman named William Jones, in whose house certain other freemen of very marked Conservative principles, were in the habit of meeting; hired a room in that house for the purpose of collecting freemen; and there a Mr. John Flint, then in Mr. Pim's employment, distributed about sixty or seventy cards, to so many freemen, who were to be paid as convessors, at the rate of 10s, and in a few instances c1 a day. Four persons, named Phillips (since dead), Joseph Moran, William Cornwall MacLean, and George Abadom Edwards, all, too, in the employment of Mr. Pim, seem, with Flint, and a person of the name of Fitzpatrick, to have been specially intrusted by Messes. Molloy and Watson with the distribution of these canvassing cards; and uncoubtedly they distributed several hundreds of them among the freemen. In addition, a man of the name of Edward F. Gillis, employed for the purpose by Phillips, deposed to having distributed about 200 among the same class: whilst Bernard Connell, to whom we have before referred, distributed a considerable number to freemen in a house in Meath-street, which had been hired with the express object of influencing this class of votors. Altogether, we believe that from 800 to 1,000 cards were thus distributed, and according to the evidence of Mr. Molloy, about two-thirds of them to freemen. It is certain that persons holding these canvassing cards were ultimately paid to the number of 748, and the sum of £1,523 is accord-

ingly returned in Mr. Pim's election account as laid out in this way.

We were unable to accertain bow much (if any), of the canvassing vouched by these cards was real and legitimate: but it is quite clear, and indeed was openly avowed, that the issue of the cards was to a great extent a scheme to corrupt voters, and especially frommen; and, speaking generally, we believe the cards were really the emblems and vouchers of corruption. A room, too, was taken in Halston-street, close to the pollingplace, for the express purpose of issuing these cards to freemen. There Messrs. MacLean and Phillips distributed them, and admittedly for a corrupt object. There is some evidence also that another room was used in the same manner; and it was proved before us that a very considerable number of cards was given to freemen on the day of polling, and in many instances not long before they actually voted. The cards usually represented that the holders had done so many days canvassing work. This, however was merely an index of the amount of money that was agreed to be paid, at the rate of 10s. a day, or even more; and, accordingly, in many cases, the cards would appear to have been filled up as for a number of days antecedent to the date of issue, and in others to have been antedated, so as to entitle the holders to payment for a time during which they did not even pretend that they had rendered any service. These, of course, were cases in which the voters required a higher than the ordinary scale of payment,

which was therefore generally secured by making the cards represent some extra days. Two remarkable instances of this practice, which obviously was directly corrupt, and which, we have no doubt, widely prevailed, were proved before us at our inquiry. In one a freeman named William Heary Finlay, who holds a responsible situation in the Midland Great Western Railway Company, was given by Bernard Connell, soon before the close of the poll, a canvassing card marked at first for four or five, and afterwards for six days canvassing, though confessedly no canvassing whatever had been done, or even thought of; and the ultimate bargain being that £6 fs. were to be paid on the eard, Finlay actually gave Connell £1 as commission for so arranging it. Finlay, however, did not, after all, monive the £6 6s ; but on presenting his card was offered by Messrs. Molloy and Watson £3 or £3 3s., as payment in full, which be refused, In the other case, a freeman, named Richard Burgess, received cards first from Bernard Connell, and afterwards at the room at Halston-street, about balf an hour before the close of the poll; and he was subsequently paid by Mr. Watson the sum of £3, as for six days canvassing, though, of course, he did not canvass at all, and the whole transaction was obviously a bribe.

We should add that a freeman named Andrew Savage, and five others, seem to have been directly bribed through these cards by a Mr. Walter Doolin, who was examined by us, and deposed to having thus purchased their votes. The sum, too, of £4 10s. appears in Mr. Pim's account as paid to Savage. We have little doubt, especially having regard to the testimony of Bernard Connell, and of Messes. Joseph Moran and Robert Keating Clay that practices of this kind were very common, and we repeat our conviction that, in point of fact, those cards were, generally speaking, merely the tokens

of bribery. We insert in schodule E to this report the names of such of the freemen voters thus employed, and paid as canvassers, as the evidence supplied enables us to identify; and whilst it may be that in some cases, which, however, we have been unable to discover, the issue and receipt of these cards were not corrupt, we do not hesitate to record our opinion, that generally speaking, they were of this character, and that the whole trans-

action was most reprehensible.

We insert in Schedule F of this Report the names of those freemen proved to have been guilty of bribery in this grosser form, and whose cases we have just referred to In Schedule G will be found the names of the persons proved to have been aiding in or abetting any corrupt practices at the election of 1865, whether on the Conservative or Liberal side.

It deserves notice that the number of freemen who voted for Mr. Pim at this election was unprocedentedly great for a Liberal condidate, which, as we believe, was largely

attributable to the influences we have described. It is, however, but right to add that Mr. Pim was then favourably regarded by the freemen as an extensive employer of labour, and that the political feelings of the great majority of the body do not appear to have been much excited on this occasion. We have now reached the General Election of 1868, the polling day of which was Wednesday, the 18th November. On this occasion the city was contested by Sir Arthur E. Guinness, bart., and the Hon. David R. Plunket on the Conservative, and

Arthur E. Guminosi, bief., and the Hoh. David E. Prinivês on the Collegerators, and by Mr. Pim and SSP Dominio Corrigon, bars, on the Liberta side: Mr. Setton was chief conducting agent for Sir A. Guinnose, and Mr. Jollas for the Hoo. D. R. Plumbet; Hener, Molloy, and Welson soling as agentle for Mr. Pim, and Mr. David Fitzgernell for Sir Dominic Corrigon. Mr. Setton, however, had as assistants Mr. Join Malet Williamma and Nr. Tomas Fell White, both solicitors of experience, and who appear to have relieved Mr. Sutton of much of the labour and anxiety which his position involved. The contest was exceedingly close and severe, but Sir A. E. Guin-ness and Mr. Pim were returned as duly elected, the number of votes recorded in their favour being 5,557 and 5,586 respectively, and those in favour of the other candidates 5,452 and 5,579. The voting of the freemen was as follows: For Sir Arthur Guinness, 2.134; for Mr. Plunket, 2.123; for Mr. Pim, 306; and for Sir Dominic Corrigan, 285. Sir Arthur Guinness, however, as is well known, was afterwards unseated on petition,

and Mr. Pim for the present remains the only actual representative of the c We believe that no corruption of the freemen was practised on the Laberal side at this election. Both the Liberal candidates, indeed, appear to have given very strict orders in this respect, which their agents, we believe, carried out; and a position for alleged corruption presented against the return of Mr. Pim was withdrawn. On the Conservative side, however, corruption of the freemen was practised under the circumstances and in the meaner to which we shall presently refer; though we are

satisfied upon the evidence that neither Sir A. E. Guinness nor Mr. Plunket authorized it, or was even cognizant of its existence at the time.

We proceed to describe the nature and extent of these corrupt practices so far as we have been able to bring them to light. They may be said generally to fall under two heads, viz., acts of direct corruption, and a series of acts more or less of corrupt tendency, and which in a great number of cases amounted to actual corruption.

With respect to acts of direct corruption they may be divided into three classes; according as they consisted in-(1), the issuing of tickets to be exchanged for money in No. 76, Capel-street; in (3), contracts for money or employment; or in (5), the payment

of travelling expenses to non-resident freemen.

In the conduct of the operation first referred to Mr. Henry Hopkins Foster, already mentioned in connexion with the bribery of freemen at the election of 1865, unquestionably took the most prominent part, though he was not without several active assistants. This gentleman who exerted himself very carnestly on the Conservative side before the election, and who about the time when the election petition was being tried by Mr. Justice Keogh, found it convenient to leave Ireland for France, where he still resides, did not, though summoned appear at our inquiry. His proceedings, however, were described by several witnesses. A few days before the day of polling (Wednesday, the 18th November), he gave directions to James Forrest, a printer, residing and earrying on business at No. 76, Capel-street, to print placards or bills some with the words "Marcus' Office," and others the words "County District Committee rooms

The character and extent of these transactions were made manifest by a large body Mr. Foster who had been a member of what was called the Working of evidence. Committee of the Inns-quay Ward, an organization specially devised and set apart for canvassing the freemen, and dealing with them, had arranged with a Mr. Henry George Hall, then a medical student, and whom he had before constituted superintendent of this Working Committee, to engage the services of some trusty agents for peculiar duty on the day of polling. Mr. (now Dr.) Hall, selected for the purpose five medical or college students who met at his house on the evening of the nomination day, and there received from him and Mr. Foster some instruction as to their duties. Mr. Foster also engaged two other young gentlemen, and having obtained the assistance of a solicitor, Mr. Edward Love Alma, the whole party met for an early breakfast at the Bilton Hotel, on the morning of the polling day. Mr. Foster soon afterwards intrusted two large packets of railway tickets to Mr. Hall, with instructions to distribute them among his associates in Green-street and Halston-street; and Mr. Alma also repaired to the polling-place, though it does not appear that any of the tickets actually came into his bands. The number of tickets given to Mr. Hall seems to have been about 800; and were as we believe upon the evidence, tickets of the Midland Great Western Railway Company, though we have not been able to ascertain by what means they reached Mr.

William John Campbell, to whom we have before referred, in speaking of the election of 1865, became aware at an early hour that bribing was going on, and in some instances received a commission from freemen who had been passed on to 76, Capel-street, by Mr. Hall and his associates. Compbell however, did not know at first of the machinery by which the bribery was being effected; but, having asked Mr. Williamson to put him in the way of thus arranging with freemen for their votes, he was placed by that gentlemen in communication with Mr. Hall, and thenceforward took an active part in the operation. Under these circumstances, too, we cannot avoid the conclusion, that Mr Williamson was aware of the corruption that was being practised, and must be considered as assisting in it. Mr. Alma remained in Green-street or Halston street while the polling was going on, and was fully aware of the distribution of tickets and of their object. Mr. Hall, too, was, of course, cognisant of the nature of these proceedings, and, in fact, the trusted agent of Mr. Foster throughout; but we are not fully satisfied that his seven companions had a guilty knowledge, though their hands actually distributed the tickets. They all denied on eath that they were privy to, or that they participated wilfully in, anything corrupt; and, as they were very young men, and may possibly have been ignorant of the real character of this business, we forbear mentioning their names. It is right, however, to add, that these young gentlemen received each &5 for their day's work, nich was paid to them out of funds in Mr. Foster's hands. Noblett, Kemp, and Watkins, also-three of the pursons actually in 76, Capel-street, that day-were paid £3 each, and Crampton £1, by Mr. Foster, who appears to have contrived and designed the whole arrangement, and, at all events, was the chief agent in the operation, and supplied, as we believe, the requisite funds.

Their names appear, amongst others, in Schedule H. to this report.

The acts of direct corruption, which form the second class consisting in contracts for money or employment, were due to the exertions of a Mr. William Hobinson and a Mr. Benjamin Warren. Mr. Robinson, who is the manager of a losa office in Swift'sarr beginning warren.

Town had previously taken an interest in elections on the Liberal side, but at this last election transferred his support to the Conservatives. He appears to have been allowed by Mr. Goodman, the honorary accretary of the City Conservative Registration Society, to look over the names of the unpledwed voters in the different wards; and on the evening of Tuesday, the 17th November, having previously intimated that he would be olad to see as many freemen as possible in Sackville-street, at the General Post Office, about eight o'clock, P.M., he met a number there, and directed them to follow him up to a large house near the top of the street, where the Conservative committee-rooms were, and in which a considerable body of voters—the great majority of whom were freemen appear to have assembled. Mr. Robinson took down a list of certain freemen there present; and, having secured promises of their votes for the Conservative candidates, addressed them in language which clearly amounted to an assurance that they should be remunerated. The names of nineteen fromen appear on this list. Of these, two only-viz. William Welker and William Bockett-can be identified with the class of freemen bribed in 76, Capel-street; and as Mr. Robinson denied all knowledge of that place until long after the election, and there was evidence before us that the expectations he held out were to be satisfied elsewhere, we think that, with the exception of Walker and Beckett, all the freemen upon this list form an independent and separate set of persons subjected to corrupt influences, and are not to be included among the number bribed in Capel-street, or by means of the railway tickets.

It remains to speak of the contracts much by Mr. Benjamin Warren. This person was a convener for the Concernatives, and was proved on the evening of the same Tuesday, the 17th November, to have prevaised more po two forement, annual Jamos Billa and Ratestal execution client demands of the benefit of the same and the same filter and technical execution client demands of the benefit of the same property and the concerning was the property and the concerning was the property to the concerning was the concerning was the concerning was to be an execution of the concerning was the concerning was the concerning was the concerning was to the concerning was to the concerning was to the concerning was the concerning was to the property to experim annual Felgy who are not made of them on to home, No. 3, Smithlights.

where however, nothing was paid. After the election Hall applied to Mr. Warren reminding him of his promises, but was informed that as a petition was threatened nothing could be done. These acts of corruption, as well as the last, were evidently quite unconnected with the issuing of tickets to be paid at 76, Capel-street; but Henry Bailey, besides the promise he received from Mr. Warren, was one of the persons actually

bribed in that way also. The third class of acts of direct corruption is connected with the payment of money for their travelling expenses to non-resident or out-votors, a body containing, in fact, a certain number of freemen, though, as we have seen, this is contrary to law; no freeman being entitled to vote if living at a distance of seven miles from the Green-street courthouse. These proceedings, for the most part, belong to the general conduct of the election; but as some freemen were identified with them it is necessary to glance at them briefly. Here again Mr. Henry H. Foster was the principal agent, though Mr. Alma and other persons also gave their services. It would appear that Mr. Williamson and Mr. White, having considered the 12th section of the statute 31 & 32 Vic. cap. 49, arrived at the conclusion that though the payment of outvoters' travelling expenses to Dublin might be thus forbidden, there was nothing to prevent the payment of their expenses back from Dublin. Accordingly, seeing that a good deal of support might in expenses tack from Dublin. Accordingly, seeing that a good deal of support highly in that way be secured, Mr. Williamson engaged for the conduct of the operation a Mr. William Johnstone, a solicitor and relative of his own, who had managed something of this kind at a previous election for the county with which Mr. Williamson was connected, and told that gentleman to put himself in communication with Mr. Foster. Mr. Johnstone did no, and Mr. Foster having in the meantime sought and obtained the cooperation of his friend Mr. Davenport Crosthwaite, a room in a house in Euratece effect. was hired in order to make the necessary preparations. Mr. Croethwaite was stationed in this room, the rent of which was paid by Mr. Johnstone, and a liability for which was acknowledged to us by Mr. Willismson.

Mr. Footer, Mr. Johnstone, and Mr. Alma, now prepared a form of circular to out-voters admittedly holding out expectations that their travelling expenses would be paid, and bearing the fictitious signature, "J. Wilson Johnstone." This document Mr. Crouthwaite copied; and his copy being than littographed, he was furnished with envelopes and other requisites, including a list of out-voters, with their addresses, and set to direct and forward the circulars. However, before any progress was made it was deemed prudent to remove the conduct of this department from Eastcoe-ettreet; it being found that a gentleman acting for the Liberal candidates had an office in the same house. Rooms, accordingly, at the top of No. 24, Dame-street, being the house occupied by the County Conservative Registration Society, were obtained from that body; and at this stage of the proceeding Mr. Johnstone was withdrawn and replaced by Mr. Alma, who thenceforward, assisted by Mr. Croethwaite, as secretary, managed the entire business. There can be no doubt that several hundreds of these circulars from the imaginary "J. Wilson Johnstone," and obviously of a corrupt character, were despatched,

and a correspondence thus opened and kept up with the Conservative out-voters Mcanwhile Mr. William Johnstone had been transferred by Mr. White, as it would appear, to No. 47, Dame-street, the central office of the conducting agents for Guinness and Plunket; and it is proper to add that this seems to have been done when Mr. Williamson and Mr. White had been apprised that the payment of any travelling expenses to out-voters was illegal. Mr. William Johnstone, however, when at 47, Damestreet, wrote a number of circular letters in his own name, and probably of an innocent

kind, to out-votors; and thus a double correspondence—the one legitimate, the other

corrupt-was carried on with the same class of persons Before the day of the election, telegrams also from both No. 24, and No. 47, Damestreet, were sent to out-voters arging them to come up; and, accordingly, a number of these persons came to Dublin and voted for the Conservative candidates on the faith of the promises so held out to them that they would be reimbursed. Mr. Crosthwaite, who had been supplied by Mr. Foster with a sum of from £150 to £200, discharged these obligations in his office at 24. Dame-street, for the most part by Post Office orders made payable to the out-voters; Mr. Alms still superintending and also giving a good deal of assistance. We have no means of ascertaining how many out-roters, nor how many freemen among them were paid in this way, nor even how many freemen received circulars as described; for although it was admitted that there had been accounts and papers from which this information might have been obtained, no such documents were forthcoming. The account of the expenditure had been accurately kept by Mr. Crosthwaite; but at the close of the transaction he, as it appears, placed this account with the answers to the "Wilson Johnstone" circulars and other papers in a box, and delivered it to Mr. Foster.

The extent, however, to which this practice was carried was unquestionably very

great. Mr. William Johnstone, and Mr. Rudolphus Mortimer, who was acting with him in 47, Dame-street, received an immense number of letters from out-voters; the latter gentleman having placed 650 of them in a box of which he still retained the key. That box, however, being carried over to the offices of the City Conservative Registration Society, was there broken open prior to the trial of the election petition, and the letters abstracted. Still Mr. Mortimer was able to speak positively as to the number so received by him; and thus, though no similar information was obtained from Mr. Alma or Mr. Crosthwaite with respect to the official correspondence of No. 24, we may form an idea of the extent to which all this dealing with out-voters was carried on. Besides what came to Mr. Mortimer's hands and those addressed to No. 24, other letters also from outvoters seem to have been received by William John Campbell. Those, which were for the most part from freemen asking for the payment of expenses, had also disappeared. They had been placed by Campbell with other documents in his drawer, in the office of the City Conservative Registration Society; but that drawer too had been forced open and the documents removed. Again, a printed list of the freemen which Compbell had, and which, according to his evidence, had been corrected so as to show the non-resident freemen and their real addresses and abodes, appears to have been left in the same office, but to have now vanished.

It is thus impossible to covertism how for this particular form of corrupting powerful amongst the formus; but we find that short of 100 or 1510 were expended in making them likes playments to ordering generally, and we have identified two instances in the contract of t

We have inserted in Schodully H to this Report, the names of such of the freemen

guilty of acts of direct corruption under any of the three classes above referred to, as we have been able to identify from the materials within our reach. In Schedule I will be found the names of persons shown to have aided in or abetted these corrupt practices.

It deserves notice that, besides the £150 or £200 which Mr. Foster supplied to Mr. Alma and Mr. Crostfwaite for payment of the out-votes, he seems to have been enabled to furnish a large sum of money for effecting the grosser bribery at Oxpol-surface.

Mr. Foster does not appear to have had any private means, and his salary as a clerk in the Registry of Deeds Office was, we are informed, under £300 a year. It is manifest, therefore, that the funds which he had in his bands for election purposes must have been placed by other persons at his disposal. Who those persons are we have been unable to discover, and it seems not improbable that Mr. Foster's refusal to attend and give evidence before us was due not so much to any approbension of the consequences to himself as to the fear of being thus obliged to implicate those by whom he had been intrusted with this secret service money. We are, however, perfectly satisfied that neither Sir Arthur Guinness nor Mr. Plunket, nor their chief conducting agents, Mr. Sutton or Mr. Julian, supplied any portion of this money, or, in fact, had any connexion whatever with the corrupt practices to which it was applied. But it is worthy of observation that on the 26th December, 1868, Mr. Foster lodged in the Royal Bank a sum of \$2,000, and on the 2nd January, 1869, a further sum of £500; both which sums still remain in the bank as denosits. Basides this, and although dismissed from his clerkship in the Registry of Deeds Office, he was enabled to ledge to his credit on an account current on the 18th January, 1869, £100, and through his sister on the 12th February following £300, and the further sum of £200 on the 5th May. He has now been absent from Ireland more than a year, during which he has resided for the most part in Paris (Rue Castigleone, No. 9), but has found means also to travel about occasionally; and even spend part of the summer at such places as Spa and Wiesbaden,

spend part of the summer at such places as Spa and Westbaden.

We shall now destribe the practices at this election which we have characterized as being of a corrupt tendency, and which unquestionably in many instances were actually corrupt. Before the election applications by voters for employment were made in great numbers to the agents of Sir A. Guinness and Mr. Plunket; and Mr. Mortimer, before referred to, depended to us that 450 letters of this kind were put up by him in his box,

and, like the out-voters' letters, abstracted from it. Even if it were assumed that this was the entire number of written applications, it cannot be doubted that those urged in person were also very numerous. It would seem, too, extremely probable that the extensive distribution of canvassing cards by persons in Mr. Pim's interest at the proceding election greatly encouraged these applications. The practice pursued on that occasion could hardly fail to induce or to confirm the belief that employment was to be the means and the pretence for rewarding voters. As a matter of fact, too, a considerable number of freemen were actually employed on the side of Sir A. Guinness and Mr. Plunket at and before the election in different duties or offices connected with it, though we have

not been able to ascertain the precise number. As to employment given to voters, it is obvious that in many cases the real character of the arrangement cannot be satisfactorily determined. It must always be extremely difficult, and in some cases impossible, to securate whether the employment has not in-fluenced the vote, and, in fact, been bribery, only in a covert form. To dispense, it would seem, with such inquiries, which, except in extreme cases were seldom successful and effectually to prevent corruption being practised under this disguise, it was provided by the 8th section of "The Representation of the People (Ireland) Act, 1868," that "no "elector who within six months before or during any election" "shall "have been retained, hired, or employed for all or any of the purposes of the "election for reward, by or on bohalf of any candidate," ... "shall be "entitled to vote at such election; and if he shall so vote he shall be guilty of a misde-"meanour." The agents of Sir Arthur Guinness and Mr. Plunket seem to have thought that, notwithstanding this enactment, voters might be extensively employed, and their votes escured and ultimately recorded for the Conservative candidates, provided only such voters renouseed all claim to remuneration for their services, and did not actually receive payment. Accordingly, a short time before the election they determined to employ voters, making them however, as a condition procedent, sign papers, which set out that their services were to be gratuitous; and besides the object of thus getting rid of the difficulty placed in their way by the statute, it is proper to add, that some of them seem to have thought that documents of this kind would also be useful to proclude the claims of persons making fictitious or exorbitant demands upon the candidates. The applicants for employment, still very numerous, readily complied with this condition, signed the gratuitous service papers, and were then freely employed in various duties more or less relating to the election, though they were voters, and notwithstanding the statute. Documents of this character, bearing the signature of 371 voters, were handed to us, and were represented as being the entire number so used. Of those 187 at least are the signatures of freemen. A specimen will be seen in the Appendix to the Minutes of Evidence, p. 1085.

These papers were sometimes signed at the Conservative central offices, No 47, Damestreet; but, as the election approached, they were widely distributed among the various ward committees and sub-agents; and, in fact, were commonly tendered for signature, and signed at all places where voters repaired to obtain employment. In some instances persons who signed these papers were of a respectable class, who perhaps did not seek reward, and would not have accepted it; but the great majority of the freemen who signed them were, as we believe, of an humble rank, and not beyond the reach of corrupt influences. It appears, indeed, that printed copies of the enactment above referred to were posted up in the different committee-rooms; and it was stated to us by several of the agents whom we examined that the voters, whether freemen or not, were informed when they signed the papers that their services were to be gratuitous; but this precaution seems to have been on some occasions omitted. As a matter of fact, however, with the exception of some of the cirks, whose case will be presently noticed, it does not appear that money was ever actually paid to frommen who signed those papers, whatever may have been their own expectations, or even the hopes held out to them

It is not difficult, we think, to perceive the pernicions tendency of a transaction of this kind. We do not say that this proceeding was simply a scheme on the part of the agents of the Conservative candidates to evade the statute, to give employment largely with a universal understanding that it should be remunerated at some convenient time; nor do we believe that in all cases these gratuitous service papers were offered and signed upon an implied agreement that the work done was to be rewarded. We believe these may be several cases in which the papers thus signed do represent the real nature of the arrangement, the freemen voters so signing being fully aware that they debarred themselves thereby from any claim for compensation, and being willing to lead their services gratuitously. But we feel it is not the less true that the freemen voters generally, and especially those of the humbler class who signed these papers, did so in the full belief that such was merely a form, and that employment would be attended with its usual consequence, payment; and that in fact, whilst thus apparently renouncing a title to reward, they were acquiring a real right to it. Nor was the circumstance, that in many instances, they were expressly informed that their services were to be gratuitous, suffi chest to dispuse their minds of this belief, for they seem to have regarded etatements of that kind as merely formal and illusory. Besides, as the warning was on some consion omitted, as they were at times allowed and even encouraged to sign these papers without any explanation or notice as to their effect, it was but natural that the notion should be diffused among them, that if they were to be employed it was not to be for nothing. All the currounding facts, the numerous applications which had been made for employment, the practices usual at elections, the precedent that had been set in 1865, and the great wealth of one of the Conservative candidates, would confirm this idea, and give it the force of conviction ; and unquestionably a great number of those from an voters, though they undertook to give their services gratuitously, and signed documents to that effect, were thoroughly persuaded that remuneration would follow. This belief was known to several in the Conservative interest, and indeed was notorious and almost evident; and thus, though there may have been no actual contract express, or perhaps even implied that the freemen so employed should be paid, they were permitted to remain under the impression that they would be remunerated, and brought up and polled for their employers notwithstanding. This, we think, was a corrupt practice on the part of the employees so voting, as well as on the part of these who knowing their expertations encouraged them to vote; the inevitable tendency being to produce the very mischief which the enactment just referred to was designed to prevent, viz., influence brought to hear upon voters through the medium of employment. While, therefore, we do not affirm that the design and use of these gratuitous service papers were necessarily corrupt, or that in every instance the transaction amounted to a corrupt practice, still we feel bound to express our opinion that the whole arrangement was reprehensible and mischievous

In ethedule K to this report will be found the names of all freemen whom we have been able to identify as having signed these documents. In many instances the use of the grathitous service papers was manifestly corrupt;

the freemen signing them upon a clear understanding equivalent to an agreement that

their employment would be paid for. We have brought several of these cases to light, and cannot forbear observing that they illustrate the nature and tendency of the whole proceeding. The gratuitous service papers, as we have said, were distributed largely among the different ward committees. They were thus placed at the disposal of the subordinate agents and even canvassers In one instance a Mr. Robert Eames, a solicitor, who had been engaged to take charge of the canvassing and other election work in the Royal Exchange Ward. having obtained the signatures of some forty-four voters, including twenty-two freemen, to gratuitous service papers, and thus apparently pledged them to work for nothing, returned their names immediately after the election to the central committee, adding a note in which he said, "A great many of those men stated positively to our "committee that they would not vote unless they were employed." It is plain upon the evidence that this was understood on both sides to mean employment for reward Indeed Mr. Eames told us very candidly that he as well as the voters meant and expected that the services of the latter should be paid for; and avowed his own belief that the signing of these gratuitous service papers "was a humbug altogether." It is plain, therefore, that as regards all the persons who thus stipulated for employment as the price of their votes, the transaction was one of more bribary, while as to any others on the list, there was an employment for reward in the strictest sense, notwithstanding which they were not only permitted but, we believe, brought up to vote in direct violation of the recent enactment; and this we example but regard as a corrupt practice on the part of all persons concerned in the matter. A copy of the document we have referred to as Mr. Eames' list will be found in the Appendix to the Minutes of Evidence, p. 1085.

In earlier case we find that a Mr. George Frein wrote to a gentleman mined HIII, the principal person is the committee-count for the Sandymene direct inflorming his the principal person is the committee-count of the Sandymene direct inflorming his content of the Connectories consistent in the sand had a large family, and was exacusing for the Connectories consistent in sent to make the north of the middle of the sand had a large family, and was read to be the content of the sand had a large family, and was read to be sufficient to the connectories of the sand had a large family and was a large family of the sand forwards to the Connectories genetic, and should make the sand family make the sand t

was to be remunerated, and the transaction was mere bribery.

In another case a freeman named Robert Wheatley wrote to Sir Arthur Guinness be-

fore the election, soliciting assistance. He received afterwards an appointment as well clerk together with other freemen at the Conservative committee-rooms in Sackville. street, and signed a gratuitous service paper. No notice seems to have been given him of the nature of the document, and he deposed that he considered it as a more form, and still expected remuneration. Indeed he appears to have thought it a positive ad vantage to get leave to sign the paper; evidently regarding it as a sort of security for subsequent payment. Accordingly, after the election he wrote to Sir Arthur Guinness, asking for remuneration. In this case, therefore, we think it should be taken that there was an understanding, that though the gratuitous service paper was signed, the em-ployment so sought for and given should be paid for.

Again, we find that a freeman named Robert Johnston wrote to one of the Conservative agents, evidently wanting money. He afterwards received an appointment at the Conservative committee rooms in Derset-etreet, and signed a gratuitous service paper, No explanation seems to have been given him of the meaning of this transaction; and he stated to ue that though he read and signed the document, he really believed he was to be paid for his loss of time. Under these circumstances we think it should be taken that the employment was given and accepted with the understanding that it would be

ultimately paid for.

In addition to these cases, in which we find there was an agreement expressed or implied to give employment to freemen for reward, and which, therefore, amounted to corrupt practices, either as being only a form of bribery ; or when followed, as the arrangement always was, by the employee voting for his employers, as being a violation of the salutary emactment we have referred to, and a misdemeanor; there were various other cases of a very suspicione kind, in which it is difficult to avoid the conclusion that such corruption existed. We forbear, however, specifying them here; and only now refer to them as examples of the mischief attending this whole scheme of gratuitous service papers, and

of the gross abuses to which it was necessarily liable. Employment all know is paid for as a very general rule, to which certainly that given for the purposes of an election has not hitherto proved to be an exception; the only difforence being that the payment is then on a more liberal, or, perhaps we should say, rather extravagant scale. Besides, it appears from the evidence before us that the freemen had always been in the habit of seeking and getting remunerative employment from the agents of the Conservative candidates as at least a compliment for their steady support at the hustings; whilst the lavish way in which employment for money was given by those acting for Mr. Pim in 1865 would only further excite the expectations of 1868. We are therefore fully satisfied that the employing of poor freemen on such an occasion must have led them to believe that they would be paid as urnal; and that the merely obtaining from such persons a formal absegration of a claim of this kind could not persuade them to the contrary. Accordingly, it was proved to us by various witnesses, and indeed admitted by some of the conducting agents themselves, that many of the poorer class of freemen who signed these papers did in fact expect payment; and as such persons voted with that belief and expectation in their minds we think such transactions, if not actually amounting to any of the corrupt practices specially for-bidden by the law, are extremely reprehensible and mischievous.

Busides the instances in which employment for roward was agreed to be given, though grainitous service papers were signed, there was a class of cases in which not only were freemen voters really employed for reward though nominally to work for nothing, but they were actually raid money on account of their employment. Here, of course, there was a palpable violation of the statuts, so soon as the person thus employed and paid had been got to record his rote. This occurred with certain clerks belonging to the staff of the Conservative Registration Society who were transferred by Mr. Hodson from that office to the Conservative Agents' Central Office in 47, Dame-street, and employed there on work immediately connected with the election. They were told that they were not in future to be paid for their labour; but it is plain that this notice was not regarded by them as serious; and Mr. Hedson himself stated to us that he also believed they would all be paid at a fixture day. Accordingly on one occasion when the men wanted their weekly rages Mr. Hodeon paid them on account a sum of £38 15s. which was obviously and indeed confessedly in return for their work; though the real usture of the transaction was sought to be concealed by making them go through the ceremony of giving I. O. Us. for the several amounts thus paid them, and which it is needless to say were never intended to be relied on as acknowledgments of debt. In these cases, therefore, there was clearly an employment of these freemen clerks for reward; and, as they all voted for the Conservative candidates, the illegality of the transaction is apparent. Probably, however, the arrangements vouched by the gratuitous service papers were often attended with more real corruption.

We insert in Schedule L to this Report the names of freemen who, in our judgment,

were guilty of corrupt practices at the last election, either as having stipulated for employment for reward as the consideration for their votes, although they may have signed grastitives service pepers, or as having been employed for reward for the purposes of the election, and subsequently voting for the candidates on whose behalf they were so employed.

In Schedule M will be found the names of the persons who have been shown by evi-

dence to have added in or abotted these corrupt practices.

It is right to state that a great number of applications for money was made by freemen to Sir Arthur Guinness as well after as before the election; and several letters of this kind were produced to us by him and Mr. Sutton. In no instance, however, would any such acollation appear to have been complied with.

any such application appear to have been complied with.

In addition to the other corrupt practices which we have thus endeavoured to describe,
we find that several absent freemen were personated at the last election. The persons

we find that several about freemen were personated at the last election. The persons guilty of this scormly diffuse appear to have been for the most part clerks employed at the Conservative fully-rooms in the Temperance Hall, a house near the principal place of polling, and itself also partly occupied by booths for freemen. William John Camboll. Before referred to, assisted in this operation, and some thirty

freemen appear to have been personated; one of the clerks, a man named Samuel Ryder, personating, as he admitted to us, about thirteen before three o'clock.

We insert in Schedule N to this Report the names of the persons whom we find to have been cultive of this criminal conduct.

Is deserved solice that, as already mentioned, the freemen who voiced for Mr. Firm it he last election, pumbered only 50g, and those for Si Domaics Corrigan 293. How far this circumstance in marked contrast with what took place in 1865, is to be nærried to the alreades of corruption on the part of the laboration, and to the coursely practices of the contrast of the laboration, and to the corrupt practices of the contrast that in 1863 the political feelings of the freeman, for the most part a vary Conservative body, were strongly assense.

Before concluding this Report, we think it right to notice some matters which chal-lenged our attention during the progress of the inquiry. The expenditure on the part of Sir A. E. Guinness in 1568, vouched by his election accounts, was the very large sum of £16,174 6s., to which also must be added a sum of £2,841, paid by him, through the City Concervaive Registrates Society, for the purposes of the revision, in antiopation. of his election, and a further sum of £100 given to the secretary of that society on a scenarate account to pay for the admission of fromen; his whole outlay connected with the election thus amounting to £13,015 6s. This indeed included the expenses of Sir Arthur's colleague, the Hon. David R. Plunket; but as he does not appear to have had any separate staff, save so far as the retaining Mr. Julian as his conducting agent may be so considered, no great allowance need be made on that account. however, right to state that the large sum (£2,841) paid by Sir Arthur Guinness through the Registration Society may be to some extent accounted for by the difficulties attending the revision of 1868, which must no doubt, have greatly increased the expenses; though hardly, perhaps, explaining the fact that they seem to have risen to more than three times the amount of former years. Again, turning to the accounts of Mr. Pim's election in 1865, we find his expenditure then amounted to £8,600; and we cannot forbear remarking that the enormous sums thus expended by Sir A. Guinness at the last election, and by Mr. Pim in 1865, contrast very strikingly with the small outlay on the part of the Conservatives at the elections of 1859 and 1857, on which occasions the expenses of each candidate seem to have been only about £1,800. These figures are not without significance, though not immediately connected with the subject-matter of our inquiry

cases, though not innoclately connected with the subject-matter of any inequirwith the proceedings of a less the effects on the Conversions ship, were not forthcomedwith the proceedings of a less the effects on the Conversions with a characteristic process, though vs applied for them. We have inserted in the several Schedules annexed to this Report the names, so far as we have been able to secertain them, of the freemen electors guilty of corrupt practices at the several elections above referred to, and of the persons guilty of adding in or abetting such corrupt practices.

your being justified in making any of these payments, and you did not keep the voucher or authority for making them-if, for example, Sir Arthur Guinness said you had no sutherity to make them, how wealth you be able to justify your payments -I always re-quired some one of the conducting agents to see the

hills before I said thom.

making the payments !-- I certainly have some of the bells still. I don't know whether I kept the original 739. If you got the bills countersigned by some of

the responsible agents in order to justify the paymonts, you didn't care about the coders !—If they were estimatery, I didn't keep them; but I certainly have some of the hills, and Dr. Beatty may have some also. Jones Corel

(The Commissioners adjourned for a short time, and on returning Mr. Phones Fell White's examination was continued as follows :---\$112. Mr. Law .- The question put to you was as to

the communication between you and Mr. Foster on the evening of the 4th or 5th of January |- It was an to a communication made to Mr. Faster by me in con-9113. You were not saked what you said to Mr. Forter; you were asked what Mr. Foster said to you !-

I must answer the question in its cutivety, or not at I must tell you what the communication was : I made a congruntication to Mr. Forter on the solicitor of file Arthur Guigness as to what had been sworn 9114. We find there are in the hill of particulars

thirty-ains or forty particulars of believy, and in only one materies is Mr. Foster's name mentioned !-I believe that to be the fact. I fixed the time as being subsequent to the furnishing of the bill of particulars. That is the only mention I made of the till of particulum.

decrement was delivered on the 19th t-What gave rise to the convenuation was, that some portion detailed either to me or to Mr. Williamson certain matters connected with Mr. Fostov, which were afterwards erorn to on the petition 9152. You and Mr Williamson had been engaged

in taking down the evidence of witnesses, and it came to your knowledge that certain presum had received beiber, and probably that was in consection with Mr. Frater's name, and then you went to Mr. Fester 1-1 may have been in error in stating it was after the bill of particulars. I really thought the bill of particulors reason to know Mr. Poster left Ireland somewhere about the 16th or 17th of Japaner 9123. Then he left Ireland before the bill of posti-

I did not know the mines of a great many of these years; nos; I did not know who they were. You did not give this list to Mr. Meredish for some days after the election, so we have been toldou gave the hit to him on the following Monday !-It is more than probable, because I do not think I went to the place. 9195. The reason we sait the question is, that Mr. White on yesterday—on the ground that he was noting as your solicitor in the matter of the petitionwished to raise for our decision this point-whether economications received in that character were privileged or not. We have indeed a strong opinion on the matter, but we do not think it desirable to discuss needless questions; and therefore we wish to sak you whether it is by your direction, or with your conter-rence, that this claim of privilege-of withhelding snewers to our questions on the ground of privilegeraised. If it is, we shall then deal with it as we think

proper?—If it is at my request do you mean?
1997. Understand the way in which the matter saisesMr. White was saked some consticus vesterday and also to-day—restorday as far as you are concernol-to which he objected to give answers, on the ground that the questions related to privileged comnumications rootived by him while setting as your solicitor. That privilege, remember, exists not for the benefit of the solicitor, but for the benefit of the elient ; the solicitor to whore facts are thus communicated by his client not being generally speaking bound to divulge three communications. It is a question for us whether that doctrine or rule applies to proceedings of this nature. Mr. White wished to relimit the point for our decision, which we are prepared to rule at the oney time, but we thought it consteous to you and right to sek you, in the first instance—and you rend not snewer now if you are not prepared to do so, you can take such time to estudder the cuestion as will suit your own convenience-whether it is by your direction, or with your concurrence, that this objection is made i-So far as the question is whether at was by my direction or instruction it is done. I sen say it is not so; but as to whether it is done with my consurrence I have not considered my sorwer to that part of the question, nor have I considered the constiton before 1996. You can take your own time to consider it?

—Yes, but I think it is a bord thing, in the first in-

stance, that in proporing our defence we should be obliged to divulge what came under our notice after 9999. When will you be prepared to give us the answer we sak for !--At any time you give me to. To-marrow. Would that said!

10000. Yes. You will be good enough, then, to be propored with an answer to our question. You must

hear in mind that proceedings of this nature are sume what different from those of ordinary tribunals L. Thou as to the question as to whether we see to kend in all the papers that came into our possession !

10101. That is another question—Mr. Whele has no papers, and it does not arise in this instance. Mr Sutton, we understand, has three or four boxes of papers which he has been surved with our averages to produce. I believe he was not in town verterlay, and he may not have got our summons in time. It is not precisely the same question as to Mr. Setton's with aciding these papers and Mr. Whate refusing to assess as to matters of fact on the ground of such communications being received white acting as your solicitor. The privilege however, you will please to remember, surposing it to exist keet, is not for the benefit of Mr. White, or Mr. Williamson, or Mr. Sutton, less for yourself as the client antividually. It is not a question into which any public consideration abould enter hat one to be determined, having regard to the claufs own interest exclusively. But, except the fees for Mr. Macdonogh and Mr. Batt, you never extered any costs against him !--I have not made any entry of costs against him.

10047. And you never charged him with any, of counse!-I suppose he will pay me some tune or orthograph 16048. But you have no entry?—I have no entries, because I don't consider the letters I wrote to him,
